SUPPORTING LIFE

Curera® Curved Pillow

If a person makes too few spontaneous movements, there is an increased risk of pressure ulcers. Regular changes of position reduce the risk of pressure ulcers. Position as required in both reclining and seated position.

Curera® Positioning is a range of stable pillows, rolls, and wedges that meet most needs for support and relief. They are also a great help when changing dressings and for patient care.

Our hygiene covers and cotton covers are also available as accessories to the pillows and rolls.

The hygiene cover does not allow liquid or air to penetrate, but is vapour permeable (vapour is wicked away).

Make sure that the patient is positioned correctly so that airways are unobstructed.

Curera® Curved Pillow is curved for comfort and stability in both the reclining position and seated position.

POSITIONING EXAMPLE
